Merenda Wallpaper Introduces the Ensemble Collection

Inspired by Marine Life, the Ensemble Collection Harmonizes the Beauty of Nature and Artistry

CHERRY HILL, N.J. – May 2024 – Merenda Wallpaper, renowned for its artistic approach to wall coverings, proudly unveils its latest offering, the Ensemble collection. Drawing inspiration from the depths of the ocean, this mesmerizing series of wallpaper patterns captures the beauty and harmony of marine life, transforming spaces into immersive works of art.

The Ensemble collection is a testament to the creative vision of Sarah Merenda, Founder and Creative Director of Merenda Wallpaper. Inspired by the works of renowned biologist and philosopher Ernst Haeckel, as well as the 20th-century French artist Emile-Allain Séguy, each design in this collection weaves together the natural complexity of marine life and artistic interpretation.

"The Ensemble collection is a celebration of the beauty found beneath the waves," says Sarah Merenda. "Each design reflects a harmonious balance and intricate detailing, inviting you into a world where craftsmanship intertwines with the complexity of marine life."

Prints in the Ensemble collection include:

Consortium: With graphic precision and delicate shading, each octopus in this design looks as if it swam straight from out of a science fiction novel. Inspired by the intricate works of Ernst Haeckel, Consortium brings forth a symphony of detailing and symmetry, making it a versatile addition to any space.

Medusa: Each jellyfish, with its vivid bell and trailing tentacles, epitomizes the beauty and delicate motion of these enchanting creatures. Versatile and captivating, Medusa adds flair and charm to any room, transforming it into a tranquil sanctuary inspired by the wonders of the sea.

Symphony: Inspired by Ernst Haeckel's scientific illustrations, this print reimagines jellyfish as structured gem-like figurations. With each jellyfish crafted with an unparalleled attention to detail, Symphony evokes a sense of wonder and admiration, as a reminder of the endless beauty and surprising intricacies found in the natural world.

FloraSwirl: Brimming with life, FloraSwirl enriches any space with vibrancy. Its lively, semi-abstract motifs invite you to rediscover the beauty of nature through the lens of Emile-Allain Séguéy's inspiration, with dynamic, colorful patterns that add exuberance to your surroundings.

Crafted with a commitment to sustainability, Merenda Wallpaper offers eco-friendly options for both residential and commercial spaces. The Ensemble collection is available in a range of paper options, all crafted from responsibly sourced materials and PVC-free substrates.

The Ensemble collection by Merenda Wallpaper is now available for purchase on the brand's website. To explore the collection and discover more about Merenda Wallpaper, visit merendawallpaper.com.
